

The **second FAST Monograph** of the planned series which is intended to document the technical and intellectual contribution that was made by RAE scientists and engineers to the aviation world has now been produced “in house” and is **now on sale in the FAST Museum Shop**.

FAST Monograph No. 2

This monograph is a reproduction of **Computing at RAE - a brief history** which was produced by **Eur Ing Richard Sizer CEng FIET FBCS CITP**.

The term ‘computing’ is first set in historical context. There is a brief description of early work on the transition from analogue to digital computing before dealing with the central digital computing service provided by Mathematics Department.
